TERMS OF REFERENCE

PROCUREMENT OF PROFESSIONAL SERVICES IN THE ASSESSMENT OF CEMENT MARKET IN KEY AREAS IN MINDANAO, PHILIPPINES

I. Background

The Philippine Competition Commission (PCC) is an independent quasi-judicial body mandated to implement Republic Act No. 10667 or the Philippine Competition Act (PCA). The PCA prohibits anti-competitive agreements, abuses of dominant position and anti-competitive mergers and acquisitions (M&A), as the law aims to enhance market competition for the benefit of consumers and businesses. The Commission, *motu proprio* or upon notification, has the power to review mergers and acquisitions having a direct, substantial and reasonably foreseeable effect on trade, industry, or commerce in the Philippines, based on factors deemed relevant by the Commission.

The Mergers and Acquisitions Office (MAO) assesses whether a merger or acquisition is likely to substantially prevent, restrict, or lessen competition in the relevant market. It considers the broad range of possible factual contexts and the specific competitive effects that may arise in different transactions, such as preliminary indications that customers may be adversely affected, existence of a high degree of market concentration, the structure of the relevant markets concerned, the market position of the entities concerned, the actual or potential competition from entities within or outside of the relevant market, the alternatives available to suppliers and users, and their access to supplies or markets, and any legal or other barriers to entry.

It is typically difficult for MAO to cover all the above-mentioned aspects within the limited timeframe allowed by the PCA. Thus, obtaining market research data will help streamline data gathering and fact verification.

II. Objectives

With reference to the MAO's aim to investigate M&A transactions that substantially prevent, restrict, or lessen competition in the relevant markets pursuant to Section 20 of the PCA, the market research subject of these terms of reference (TOR) shall provide in-depth market-related information on the cement industry in the Philippines. The results of the market research will be used to identify the value chain in the cement industry, market players, market structure, regulatory framework, industry-wide or firm-specific business practices, cost and revenue streams and other information that may impact the competitive conditions in the cement industry.
